

BIG AIR SHOW

The MBS Big Air Demo Show brings the excitement of Mountainboarding out of the mountains and into the cities. A combination of skateboarding, snowboarding and biking, Mountainboarding is the newest extreme show on the scene.

We provide a turn-key half hour choreographed stunt show filled with speed, jumps, humor and a positive message. Or supply your message or promotional product and we'll make it part of our show.

Spins, flips and rail slides are an integral part of this high energy show. With music pumping riders climb atop a 2 story roll-in tower and fly onto the course at close to 30 mph, launch off a huge jump and then right into a 10' quarter pipe. This show has all the thrills and spills an audience could ever want. Combine this with major audience participation and you've got yourself one heck of a show. Let MBS Mountainboards bring your event to the next level.
